TIPS FOR USING GOOGLE SLIDES

What if I want a hard copy?

All Google Slides can be printed if desired. Some slides contain lots of color graphics. If this is the case, you may want to consider adjusting printing options to print in Black and White.

Can I modify a file?

Yes! Many resources contain various options for student response and practice. You can limit the number or type of questions students respond to. Follow the steps below to modify this product to make it just right for your students.

1. Make a COPY of the file. You will make all revisions to the COPY. This way you always have the original if you want to change the options for your class in the future.
2. In EDIT mode, the slides will appear on the left side of the screen. Click on the thumbnail of the slide(s) you do not want in the file shared with your students. DELETE these files by pushing the delete button.
3. Once you have deleted all files you do not want, share the file with your class.

How do my students respond or interact with this product?

Students can interact with this product the way they would any other Google Slide while they are in EDIT mode. In this product, students move objects and type responses in premade text boxes. The text boxes are easy to see because the text is in color. Students simply click on the words and replace them with their response. Your students might need you to show them the first couple times, but they will quickly get the hang of it.

NOTE: For the assessment you will need to have the printed sheet available for the student to complete.

When you open the link you will be prompted to make a copy. Once you have created a copy, you can rename the file and save it in your desired location in your Google Drive. You can edit this copy. This file will be shared with your students.

You can share the file you copied with students by creating an assignment in google classrooms. For individual responses, make sure you select the option for all students to get a copy when attaching the file to the Google Classroom assignment. When you want all of the students to respond using the same document, give them editing privileges. It is also possible to share with individual students via the blue SHARE button.

Note: If you haven't created a free Google account, you will need to do that before downloading the product. If students are working on their individual devices, they also need their own account.
